KELAS: TI-2A

NIM: 1841720048

Topik

Pengenalan JSON, penggunaan postman, Public API, Restful API, cURL

Tujuan

Mahasiswa diharapkan dapat:

- 1. Memahami cara konsep JSON
- 2. Memahami cara menggunakan Postman untuk mengambil data JSON
- 3. Memahami Public API, Restful API
- 4. Memahami penggunaan cURL

Praktikum – Bagian 1: Registrasi Account di layanan Public API dan Test API menggunakan Postman

KELAS: TI-2A

KELAS: TI-2A

KELAS: TI-2A

KELAS: TI-2A

^ 🦟 🔚 Ф)) ENG 7:23 РМ 🃮

KELAS: TI - 2A NIM: 1841720048

Praktikum – Bagian 2: Membuat Aplikasi Movie List Code Igniter Menggunakan Public API

```
Langkah
              Keterangan
    1
              Duplikasi Project Code-Ketiga dan berilah nama project Code-ketujuh
                                                     Code-ketujuh
    2
              Lakukan perubahan konfigurasi $config['base_url'] = 'http://localhost/rest-api/Code-
              ketujuh/'; pada config.php
                               $config['base_url'] = 'http://localhost/Code-ketujuh/';
              Buatlah sebuah file index.php pada folder view/movie/ dan tuliskan script seperti gambar
    3
              dibawah ini:

∨ views

                    > errors
                    > home
                    > mahasiswa
                    movie
                    m index.php
                          <div class="row justify-content-center">
<div class="col-md-8">
                             <div class="input-group mb-3">
    <input type="text" id="search-text" class="form-control" placeholder="Input Movie Title" aria-label="Recipient's</pre>
                                 <button class="btn btn-primary ml-2" type="button" id="btn-search">Search <i class="fa fa-search"></i></i></button</pre>
                        <div class="modal fade" id="exampleModal" tabindex="-1" role="dialog" aria-labelledby="exampleModalLabel" aria-hidden="t</pre>
                          <div class="modal-dialog modal-lg" role="document"</pre>
                           <div class="modal-content"</pre>
                               <h5 class="modal-title" id="exampleModalLabel">Movie Details</h5>
                               <button type="button" class="close" data-dismiss="modal" aria-label="Close">
                                <span aria-hidden="true">&times;</span>
                             <div class="modal-body">
                             <div class="modal-footer">
                               <button type="button" class="btn btn-secondary" data-dismiss="modal">Close</button>
```

KELAS: TI-2A

```
Buatlah sebuah file controller Movie.php pada folder controller dan tuliskan script seperti
4
      gambar dibawah ini:
                                         controllers
                                          m home.php
                                          index.html
                                          🖛 login.php
                                          mahasiswa.php
                                          movie.php
                                          m pengampu.php
                                          m user.php
                                          m welcome.php
               <?php
               defined('BASEPATH') OR exit('No direct script access allowed');
               class Movie extends CI_Controller {
                   public function index()
                        $this->load->view('template/header');
                        $this->load->view('movie/index');
                       $this->load->view('template/footer');
                   }
               /* End of file Movie.php */
5
       Selanjutnya buat file javascript script.js pada folder assets/js/ kemudian tuliskan script
       seperti gambar dibawah ini:
```

KELAS: TI-2A

```
JS bootstrap.bundle.js
                                         JS bootstrap.bundle.j...
                                         JS bootstrap.bundle....
                                         JS bootstrap.bundle....
                                         JS bootstrap.js
                                         JS bootstrap.js.map
                                         JS bootstrap.min.js
                                         JS bootstrap.min.js....
                                         JS script.js
         ch-text').on('keyup', function(e){
    if(e.keyCode == 13)
        searchMovies();
$('#btn-search').on('click', function(e){
    searchMovies();
$('#movie-list').on('click', '#btn-details', function(e){
       url: http://www.omdbapi.com',
        type: 'GET',
dataType: 'json',
        data:{
            'apikey' : 'fcbf97c7', //API Key
'i' : $(this).data('id') //Parameter i untuk pencarian film berdasarkan id film / omdbID
        success: function(result){
            if(result.Response === "True"){
               <img src="` + result.Poster + `" class="img-fluid">

     <la class="list-group-item"><h4>`+ result.Title +`</h4>
                                  <\!\!\!\text{li class="list-group-item"}\!\!\!>\!\!\!\text{Released : `+ result.Released +`<\!/li>
```

KELAS: TI - 2A NIM: 1841720048

```
class="list-group-item">Genre : `+ result.Genre +`
class="list-group-item">Writer : `+ result.Writer +`
class="list-group-item">Actors : `+ result.Actors +`

                                                   class="list-group-item">Production : `+ result.Production +`
                                                   Plot : `+ result.Plot +`
                  function searchMovies(){
                      $.ajax({
                         url: http://www.omdbapi.com',
                          type: 'GET',
                          dataType:'json',
                          data:{
                              'apikey' : 'fcbf97c7', //API Key
's' : $('#search-text').val() //Parameter s pencarian film berdasarkan judul
                          success: function(result){
                              let movies = result.Search;
                              $('#movie-list').html('');
                              if(result.Response == "True"){
                                  $.each(movies, function(i, data){
                                     $('#movie-list').append(`<div class="col-md-4 mb-3">
                                           <img src="`+ data.Poster +`" class="card-img-top" height="300p</pre>
                                           <div class="card-body"><h5 class="card-title">`+ data.Title +`</h5>
                                           Year : `+ data.Year +`
                                           da href="#" class="btn btn-primary" id="btn-details" data-id="`+ data.imdbID +`"
data-toggle="modal" data-target="#exampleModal">Show Details</a>
                                  $('#movie-list').append(`
                                          <h1>`+ result.Error +`</h1>
                     $('#search-text').val("");
6
          Tambahkan script pada footer.php pada folder template seperti gambar dibawah ini:
                   |doctype html
                   <html lang="en">
                   <script src="https://code.jquery.com/jquery-3.2.1.min.js"></script>
                      <script src="https://cdnjs.cloudflare.com/ajax/libs/popper.js/1.14.3/umd/popper.min.js">
                     <script src="assets/js/bootstrap.js"></script>
7
          Tambahkan juga script pada header.php pada folder template seperti gambar dibawah ini:
```

KELAS: TI - 2A

```
| doctype html
|
<html lang="en":</pre>
                       <meta name="viewport" content="width=device-width, initial-scale=1, shrink-to-fit=no">
                      k rel="stylesheet" href="<?= base_url();?>assets/css/bootstrap.css">
                      k rel="stylesheet" href="https://stackpath.bootstrapcdn.com/bootstrap/4.4.1/css/bootstrap.min.css" integrity="sha
                      k rel="stylesheet" href="https://cdnjs.cloudflare.com/ajax/libs/font-awesome/4.7.0/css/font-awesome.min.css"
                          .badge{
                              margin-left: 3px;
                      <title>Movie Search</title>
                       <nav class="navbar navbar-expand-lg navbar-light bg-light">
                              <a class="navbar-brand" href="#">CI</a>
                              <button class="navbar-toggler" type="button" data-toggle="collapse" data-target="#navbarNav" aria-controls="r</pre>
             27
28
29
30
31
32
33
                              <div class="collapse navbar-collapse" id="navbarNav">
                                          <a class="nav-link" href="<?= base_url(); ?>">Home <span class="sr-only">(current)</span></a>
                                    class="nav-item"
                                        <a class="nav-link" href="movie">Movie Search</a>
                                         <a class="nav-link" href="#">About</a>
8
          Jika sudah selesai, hasil akhir aplikasi pencarian film adalah seperti gambar dibawah ini:
                                                   X 4 API Description - OMDb | Ar X & OMDb API - The Open Mov X Open Download Postman App
                              X Novie Search
           ← → C ① localhost/Code-ketujuh/movie
                     CI Home Movie Search About
                                        Input Movie Title
          Lakukan pencarian informasi film dengan mengetikan keyword berupa judul film seperti
9
          gambar dibawah ini:
```
